## 👛 PROFESSIONAL EXPERIENCE

### Valeo, Junior Algorithm Engineer

Jul 2022 – present  
Cairo, Egypt

- Develop software in the ADAS (Advanced Driving Assistance Systems) field.
  - Develop Autonomous Driving vehicle algorithms based on object models constructed from vehicle multi-sensors data (camera, radar, laser, ultrasonic sensors).
  - Write and analyze requirements specifications.
  - Design software architecture and reusable software components/algorithms.
  - Develop & test the state-of-the-art algorithms enabling Automated Driving Parking Systems.
- Examples: MAPs constructions, slot detection, motion planning, obstacles avoidance
- Develop the autonomous driving algorithms to steer and drive objects/robots/cars through a virtual map

### IBM, Artificial Intelligence Analyst Trainee

Jul 2019 – Jul 2019  
Cairo, Egypt

- Passing the IBM Academic Certificate Exam for Artificial Intelligence Analyst 2019 Mastery Award.
- Building Chatbots using IBM Cloud.
- Working with IBM Knowledge studio to get insights from PDFs and Word Files.
- Working with IBM Watson Assistant to increase the intelligence of the chatbots.

## 🎓 EDUCATION

### B.Sc. in Communication and Electronics Engineering, Faculty of Engineering, Suez Canal University

Sep 2016 – Jul 2021  
Ismailia, Egypt

- CGPA 2.24 / 4.00 (Good)
- Coursework: Communication systems, Electronics, Waves, Satellite communication, Networks, and Neural Networks.
- Graduation Project: Pharmacy Smart System: Designed and implemented a deep learning-based software to detect and recognize handwritten medical prescriptions. (GPA: 4.00 / 4.00 (A))

## 🧠 SKILLS

#### Programming Languages

- C / Embedded C
- C++
- Java
- Assembly
- MATLAB

#### Microcontrollers

- ARM Cortex-M4 TM4C123GH6PM
- AVR ATmega32
- Raspberry Pi
- Arduino

#### Machine Learning Frameworks

- TensorFlow
- Keras
- Scikit-Learn

#### Scripting Languages

- Python
- Shell (Bash)
- Makefile

#### Simulation and analysis tools

- Simulink
- LabView
- Proteus
- KiCad

#### Knowledge

- ADAS Algorithms
- Sensor Fusion
- Kalman Filters
- Self-Driving Cars Algorithms
- Mapping and Localization Algorithms

#### Software Engineering practices and tools

- Git
- Linux/Unix
- Real-Time Operating System
- Software Testing
- Embedded Systems Layered Architecture [APP - HAL - MCAL]

#### Microcontroller Peripherals

- DIO
- ADC
- Interrupt
- Timers
- UART - SPI - I2C
- CAN - LIN - FlexRay

## 📜 CERTIFICATES

ISTQB Certified Tester Foundation Level  
ISTQB®

Machine Learning Nanodegree  
Udacity

Mathematics for Machine Learning  
Imperial College London via Coursera

Embedded Systems - Shape The World  
The University of Texas at Austin via Edx

Deep Learning Specialization  
DeepLearning.AI via Coursera

Introduction to Embedded Systems Software & Development Environment  
University of Colorado via Coursera

Artificial Intelligence Analyst - Mastery Award  
IBM

## PROJECTS

### **Prescription-HTR, Graduation Project Role**

Handwritten text recognition system designed to detect and recognize drug names out of Egyptian medical prescriptions based on CRNN model, trained on IAM English Handwritten Words Dataset, followed by CTC decoding algorithm and a language model for spell correction. (*Python, OpenCV, TensorFlow, Editdistance*).

Jun 2020 – Jul 2021

### **Morse Code by Arduino**

Arduino transmitter which converts English words into Morse Code and then represents it in light and sound form with laser and buzzer, Arduino receives words through serial Bluetooth communication. Designed an android mobile application, and desktop application to communicate with Arduino, also implemented OCR to detect digital or printed English words and then send them to Arduino. (*Python, C++, OpenCV, Pytesseract, PySerial, PyQt*).

Jul 2018 – Aug 2018

### **ROV Image Processing**

Image Processing system designed to detect shapes of triangles and rectangles underwater, detect colors of red, yellow and blue, and OCR model to detect printed tag of a drowned airplane to assist ROV identifying the airplane. (*Python, OpenCV, Pytesseract*).

Jan 2017 – Feb 2017

## VOLUNTEERING

### **NASA Space Apps Cairo, Technical Support Specialist**

Aug 2019 – Oct 2019

### **IEEE Suez Canal University Student Branch, Chairman**

Sep 2018 – Sep 2019

### **MATE Arab Regional ROV Competition, Safety Judge**

Feb 2018 – Apr 2019

### **Fab Lab Ismailia, Makers Hunter**

Dec 2017 – Apr 2019

### **IEEEmadC, Student Ambassador**

Aug 2018 – Jan 2019

### **IBM Digital Nation Africa, Student Ambassador**

Jun 2018 – Jan 2019

### **NASA Space Apps Ismailia, Technical Lead**

Aug 2018 – Oct 2018

### **IEEE Suez Canal University Student Branch, Technical Member**

Jun 2017 – Sep 2018

### **SCU Racing Team, Technical Member**

Jul 2017 – Aug 2018

## LANGUAGES

### **Arabic**

Native

### **English**

C2 Proficiency Level - EF SET
